

QNAP[®] 2

COPPER NAPHTHENATE READY TO USE

QNAP[®] 2, Copper Naphthenate RTU, is now available from Arch Wood Protection. Especially important to the piling industry, this 2% oil-borne preservative can be used in the field as a brush-on application for end cuts, dap cuts, drill holes, and other applications where cuts into treated material require field treatment.

- **Meets American Wood Protection Association (AWPA) M-4 End Cut and Field Cut requirements**
- **Ideal for treating**
 - piling field cuts
 - ties used for landscaping
 - bridges
 - railroad ties
 - field framing utility poles
- **5 gallon pails are packaged with 36 pails on a pallet**
