Want to create it, build it, repair it, update it, beautify it?
Choose Wolmanized® Outdoor® Wood.
Ask for it by name.
Congratulations!
You’ve helped reduce your environmental footprint!

Enjoy peace of mind that comes from choosing wood preserved that is created from responsibly harvested trees.

Wood, nature’s sustainable building block — grown in managed forestlands with only the sun and water necessary for nurturing.

Finally, you chose wood preserved with Wolman® E copper azole from Lonza Wood Protection, a company that holds environmental values as a core building block of their business principles.

The Future of Your New Project

Your new outdoor project should prove to be a very worthwhile investment – one that adds to the enjoyment of your home while adding to your home’s value.

To enhance that value, we used quality preserved Wolmanized® Outdoor® Wood. It is protected from termite damage and fungal decay by a long trusted and proven wood preservative.

What to Expect with Your Wood Project

Now that your project is complete, it is ready to enjoy immediately and will continue to bring years of good use to you.

You do not need to worry about the structural soundness of the wood. No additional treatment is needed to retain its resistance to termites and fungal decay.

Ultraviolet rays from the sun will eventually cause the wood to turn a driftwood gray color. For a different look (for example, if you want your project to complement the color of your home), you can apply a paint or stain. For best results, make sure the wood is dry before coating.

Rain, moisture, and atmospheric conditions may cause checking (cracking) or warping. You can minimize this by applying a surface water repellent every year or two.

As with anything that is outside, your project may need refreshing by cleaning with a wood brightener.

Whenever using stain, paint, deck brightener, or water repellent, be sure to follow the manufacturer’s recommendations.
Your project includes Wolmanized® Outdoor® Wood treated to Above Ground and Ground Contact retentions. Both are made from abundant, managed forest lands and have been preserved for long-term protection against termites and fungal decay.

**The BARamine® Advantage**

Taking preservation a step farther, our Wolmanized® Outdoor® Wood is enhanced with BARamine® technology, a high-powered innovation created to enhance the performance of preservative-treated wood.

What makes BARamine® technology better?
- Better preservative coverage throughout the wood
- Protection against more types of decay and fungi
- Patented technology
Painting, Staining, & Coating

Your preserved wood project can be stained or painted and it should be coated with a water repellent every couple of years to help maintain appearance.

As with any coating, always follow the manufacturer’s directions on the product label.

How long you must wait before the wood is dry internally depends on the climate and the wood’s exposure.

Too dry is always better than too wet!

PAINT AND SOLID COLOR STAINS — Do not apply until the wood is dry, both on the surface and internally. Otherwise, as the wood dries out, escaping moisture will cause blisters and poor adhesion in the paint. As with painting untreated wood, application of a primer is suggested for best results.

SEMI-TRANSPARENT STAINS — Semi-transparent stains can be used after the wood has dried long enough to ensure that they will be absorbed evenly into the surface. Be sure to test an inconspicuous area to make sure that application does not result in uneven color or blotchiness.

WATER REPELLENTS — Most water repellents can be applied immediately. Be sure to follow the manufacturer’s instructions.

Helpful Hint!

Perform the following test to determine if your project is ready to paint or stain:

- Place a few drops of water on the area to be coated.
- If it beads up, it is too wet to coat, and you’ll need to wait.
- If it absorbs the water readily, it is ready to coat.
Wolmanized® Residential Wood
LIMITED WARRANTY

I. Warranty Coverage

Subject to the terms and conditions set forth in this Limited Warranty ("Warranty"), Arch Treatment Technologies, Inc. ("Arch") warrants that Wolmanized® Wood will be resistant against decay caused by termites or fungal decay that renders such Wolmanized Wood structurally unfit for its Permitted Use for as long as a Homeowner owns the structure built using Wolmanized Wood. In this Warranty, the term "Wolmanized® Wood" refers to both Wolmanized® Residential Outdoor® Wood (pressure treated with our Wolman® E copper azole preservative) and Wolmanized EraWood® Lumber (pressure treated with our Wolman® AG preservative). Capitalized terms used in this Warranty are defined herein or in the AWPA or ICC-ES evaluation report.

II. Who is Covered

Arch extends this Warranty to the original purchaser of Wolmanized® Wood or the first owner ("Homeowner") of a structure built with Wolmanized® Wood if the structure is built by a contractor or builder. This Warranty is not transferable to any subsequent owner or beneficiary.

III. Duration

The Warranty period begins on the date the Homeowner or the Homeowner's contractor, as applicable, purchases the Wolmanized® Wood and lasts for as long as the Homeowner owns the property on which the Wolmanized Wood structure is built. Coverage terminates when the Homeowner sells or transfers such property.

IV. Requirements for Coverage

All of the following conditions must be met for Warranty coverage:

1. The Homeowner must show that all of the wood submitted for Warranty coverage is Wolmanized® Wood that references the Wolmanized® Wood brand name and website (www.wolmanizedwood.com) on the end tag that is attached to such wood.
2. The Wolmanized® Wood must be used within the fifty (50) United States of America, however, Douglas fir, hem-fir, and western hemlock are only covered by this Warranty when used in the states of Alaska, Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming, and Hawaii. For the avoidance of doubt, Wolmanized® Wood used outside of the fifty (50) United States, including Wolmanized® Wood used in any U.S. territory or protectorate is expressly excluded from the Warranty.
3. The Wolmanized® Wood must be used in a privately-owned residential or agricultural property. Wood used in any other type of property, including commercial, industrial, or commonly owned property (including condominiums) or multifamily apartment buildings is not covered.
4. The Wolmanized® Wood must only be used in an application that conforms to the product use categories established by the AWPA or ICC-ES evaluation reports that are in effect at the time the Wolmanized® Wood is installed ("Permitted Use"). The Permitted Use is listed on Wolmanized® Wood end tags (for example, the end tag will state whether a piece of Wolmanized® Wood is treated for Above Ground, Ground Contact, or Ground Contact Heavy Duty Permitted Uses). For more information on selecting Wolmanized® Wood that adheres to the Permitted Use requirements, please visit www.WolmanizedWoodU.com.
5. The Wolmanized® Wood must be installed as follows:
   (a) Surfaces that have been cut or trimmed may not be used in the ground.
   (b) Surfaces that have been cut or trimmed and other holes or damage should be treated with a wood preservative end-cut solution in accordance with the label's directions. Acceptable wood preservatives include Outlast® Q8 Log Oil or other products containing a minimum of 0.675% copper as oxine copper (copper-8 or copper-8:quinoline) or 1% copper as copper naphthenate.
   (c) The structure built with the Wolmanized® Wood must be built in accordance with all applicable laws, regulations, ordinances, and building codes.

V. What this Warranty Does Not Cover

This Warranty does not cover:
1. damage resulting from any cause other than termites or fungal decay including, but not limited to surface mold growth, staining (such as blue stain), damage from exposure to weather (such as discoloration, graying, splitting, cracking, checking, warping, or twisting), ordinary wear and tear, misuse, or acts of God (such as a lightning, wind storm, hurricane, tornado, hail, flood, fire or similar natural phenomena);
2. Wolmanized® Wood that is used in foundation systems or in framing (such as Permanent Wood Foundation systems, piling, post frame type construction using round poles or heavy timbers);
3. Wolmanized® Wood that is used in swimming pool sidewalks;
4. Wolmanized® Wood used as vineyard stakes or tree supports in agricultural applications;
5. Wolmanized® Wood that is immersed in salt water; or
6. damage that does not render Wolmanized® Wood structurally unfit for Permitted Uses.

VI. How to Make a Claim

1. To make a Warranty claim, Homeowners must provide end tags (which were attached to the Wolmanized® Wood when it was purchased) and the original purchase invoice that relate to the damaged Wolmanized® Wood. Arch requires that Homeowners provide enough end tags to show that the amount of Wolmanized® Wood originally purchased equals or exceeds the amount that is claimed to be damaged. If Wolmanized® Wood was purchased for more than one Permitted Use (e.g., Above Ground Wolmanized® Wood for deck railing and Ground Contact Wolmanized® Wood for deck joists), Homeowners must provide end tags for each type of Permitted Use. These should be sent to:
   Arch Treatment Technologies, Inc.
   Attention: Wolmanized® Wood Warranty Claim Administrator
   360 Interstate North Parkway, Suite 450
   Atlanta, GA 30339
2. Homeowners may register Wolmanized® Wood purchases at www.wolmanizedwood.com/register. Once registered, Arch will keep Homeowners' purchase information (including copies of end tags and invoices) on file for future reference. When making any Warranty claim, Homeowners may be required to send Arch photographs and pieces of damaged and sound wood. In addition, Homeowners must permit Arch or its representatives to inspect the structure and test the wood that is claimed to be damaged.

VII. Remedy

When a Homeowner makes a valid claim, Arch will, at its option, either (1) provide new Wolmanized® Wood to replace the damaged wood or (2) reimburse the Homeowner for the actual, reasonable cost of new Wolmanized® Wood to replace the damaged wood. Arch is not responsible for costs of labor or any other costs associated with repair, removal, disposal of damaged wood or the delivery, handling, installation, construction, repair, applicable taxes, or similar costs of replacement Wolmanized® Wood.

VIII. Limitation of Liability

1. In no event is Arch or its affiliates liable, whether in tort, contract, or under any other legal theory, for any direct, indirect, incidental, special, consequential, or punitive damages any kind, whether relating to economic loss, property damage, death, or personal injury, regardless of the cause, arising out of or relating to the purchase or use of Wolmanized® Wood, even if Arch has been advised of the possibility of the claim. Some states do not allow the exclusion or limitation of incidental or consequential damages, in which event the above limitation or exclusion may not apply.
2. By purchasing Wolmanized® Wood, each Homeowner accepts this limited Warranty and acknowledges that this limited Warranty is the only warranty offered by Arch with respect to Wolmanized® Wood and replaces all other representations and warranties, expressed or implied, including warranties of merchantability or fitness for a particular purpose. If applicable law prohibits the exclusion or limitation of implied warranties, the duration of such warranties shall be no longer than the duration of this Warranty. Some states do not allow limitations on how long an implied warranty lasts, in which event the above limitation or exclusion may not apply. Only Arch is liable under this Warranty and its directors, officers, employees, affiliates, and agents have no liability to Homeowners or to others with respect to the purchase or use of Wolmanized® Wood.

This Warranty provides Homeowners with specific legal rights. Homeowners may have other rights, which vary from state to state.

To register your warranty, visit www.WolmanizedWood.com/register.
We have completed the work you have requested, and trust you will enjoy your project for many years to come.

Constructed by:

To help make that happen, we have built it with Wolmanized® Outdoor® Wood. This wood is covered by a limited warranty (see inside).

Also enclosed are tips on maintaining the wood so you get the most satisfying appearance and performance from your project.

Please keep your receipt along with a sufficient amount of end tags* (at least 12) here.

*NOTE: If you purchase wood for use both above ground (e.g., decking) and ground contact (e.g., posts), include at least six end tags for each type.
