

SERVICEFIRST

PARTNERSHIP. PERSONALIZED ATTENTION.

Lonza

SURFACE APPLIED TECHNOLOGIES

SERVICEFIRST

Lonza Wood Protection is committed to building long-term relationships with our customers, providing value added services, and developing strategic partnerships.

Our focus is on providing:

The highest quality anti sapstain products paired with the best application solutions for your site.

A product treated to protect wood from its natural enemies and used in whole house framing, including roof trusses and structural members.

With decades of experience, we understand the importance of proper application systems and the role those systems play in protecting your products.

Along with products and state-of-the art application systems, we also offer support services to optimize your production. These services include

- Technical expertise
- Quality control
- Engineering
- Training
- System monitoring

Lonza

SERVICEFIRST

PARTNERSHIP

Our strategic partnership means:

- Dedicated service personnel
- Our resources available to our customers
- Marketing services

 - PLC integration
 - Data tracking on a minute-by-minute basis
 - Alarm and warning protocols to notify when system is out of specification
- Tailored to each site with individual remote monitoring sites available
- Hosted on AWS cloud for trusted reliability and data management

Products with Proven Performance

WOOD PROTECTION PRODUCTS

ANTIBLU® WOOD PROTECTION PRODUCTS

AntiBlu® anti-sapstain products provide short-term protection for logs, poles, and lumber against biological growth that can harm the wood's color and desirability. The Mycostat® family of products are featured in the AntiBlu® line along with specialty items for controlling log pre-infection, iron stain, end checking and appearance weathering.

DECAY PROTECTION

WOLMAN® AG*

Wolman® AG is a WDMA Hallmark certified non-metallic preservative that is ideal for protecting windows, doors, house trim and other millwork. Protects against termites and fungal decay.

WOOD PRESERVATIVE

FRAMEGUARD® TREATMENT*

FrameGuard® treatment is a combined solution of anti-mold chemicals and preservative technology, providing protection against mold and termites. It protects lumber, plywood, OSB, wood I-joists, and Ivl.

INSECTICIDE

PERMATEK® INSECTICIDES*

Permatek® products are specially formulated insecticides for the control of wood damaging insects for lumber and engineered wood products. They can be used as a surface treatment but can also be added to the glue-line process in the creation of engineered wood.

*Available only in the United States

ENVISION A WORLD BUILT WITH WOOD®

At Lonza, we support a better quality of life for our communities by delivering technologies that enhance the performance and increase the longevity of wood, the world's greatest renewable resource™.

Through strategic acquisitions and in-house formulation expertise, Lonza has developed a comprehensive portfolio of innovations in treatments designed for products such as freshly sawn lumber, windows and doors, siding, fascia, and engineered wood products.

Lonza also continues to be a trusted supplier in the field of wood protection, making wood resistant to mold and moisture, termites, fungi, smoke development and flame spread while enhancing its beauty. We support our customers with an industry leading level of service designed to boost their success.
